

### Continue Mission

Continue pursuing the mission objective

COMMON

SWB01

NAV

### Reduce Speed / Safer Nav

NAV risk down;  
Stress -1 if team stabilizes

NAV

SWB02

NAV

### Internal Sync (60 seconds)

Stress -2; align team coordination and tempo

COMMON

SWB03

STRESS

### Increase Speed

Accelerate to change tactical geometry or reduce exposure time

NAV

SWB04

NAV

### Increase Lookouts / Visual Confirm

Improves confidence vs AIS / radar deception; may reveal spoofing

NAV

SWB05

NAV SENS

### Switch To Passive Picture (ESM/Visual First)

Improves threat attribution confidence without relying on AAW

AAWO

SWB06

SENS

### Start Investigation

Reveals clues and / or stabilizes one investigated component by facilitator adjudication

COMMON

SWB07

SENS

### Start In-Depth Investigation

Facilitator reveals deeper origin / target / propagation details for the declared component(s)

COMMON

SWB08

NAV SENS FIRE

### AIS Tracks Re-Evaluation

Reclassifies tracks and removes one deceptive or unreliable AIS track marker

NAV

SWB09

NAV SENS

### Isolate System

**Stops propagation from IBMS / INS (incl. WECDIS) to ASUW TRACKING RADAR**

CYOP

SWB10

• NAV • FIRE

### Restore System From Backup

**On success: NAV improves 1 step**

CYOP

SWB11

• NAV

### Disconnect AAW

**Immediately stops further sensor-side escalation this turn; may prevent cascading effects**

AAWO

SWB12

• SENS • AAW

### Cyber Containment Posture

**Reduces probability of escalation**

CYOP

SWB13

• NAV • SENS • COMMS

### Reboot Affected System

**Can clear visible symptom or improve one affected system by +1 on partial / full success**

EO

SWB14

• SENS • FIRE

### Repair Component

**Restores the declared faulty component and clears one related malfunction condition on success**

EO

SWB15

• SENS • FIRE • AAW

### Reconnect AAW

**Restores air picture potential**

AAWO

SWB16

• SENS • AAW

### Shift To Manual Procedures (Bridge)

**Keeps navigation safe even if NAV remains degraded; reduces catastrophic nav outcomes**

NAV

SWB17

• NAV

### Damage Control Focus

**Improves one weapon by 1 level (Disabled -> Degraded or Degraded -> OK)**

PWO

SWB18

• WPN

### Correct Course

Alter course to compensate for drift, current, or positional error

NAV

SWB19

NAV

### General Quarters

Raises combat posture and enables immediate readiness handling for kinetic resolution

COMMON

SWB20

STRESS WPN

### Prepare Target

Initiate target preparation using passive means only (ESM / visual)

PWO

SWB21

FIRE WPN

### Conservative Engagement Doctrine

Reduces chance of catastrophic miss / collateral effect

PWO

SWB22

FIRE

### Close Range To Compensate

Enables engagement despite degraded tracking / fire control

PWO

SWB23

FIRE WPN

### Approach Target

Closes range to enable gun / manual engagement under degraded lock

PWO

SWB24

NAV FIRE

### Hold Fire / Delay Engagement

Buys time for validation and recovery actions

PWO

SWB25

FIRE

### Shift To Manual Gun Fire

Enables surface engagement without relying on full firing solution

PWO

SWB26

FIRE WPN

### Fire Missile Counterattack

Launches missile counter-engagement; on good conditions can reduce surface threat posture

PWO

SWB27

FIRE WPN

## Engage Target with Gun

Executes automatic tracking gun engagement to suppress or neutralize a surface threat at facilitator adjudication

PWO

SWB28

● FIRE ● WPN

## Decoy Deployment

Improves survivability versus next missile attack by decoy effect

AAWO

SWB29

● WPN ● AAW

## Approach Land (Emergency Concealment)

May reduce immediate hostile detectability at facilitator discretion

NAV

SWB30

● NAV

## Contact / Query the MTC

Open a topic or query for the MTC

OPS

SWB32

● COMMS
